ELSEVIER

Nuclear Engineering and Design 167 (1997) 393–395

Nuclear Engineering and Design

Contents of Volume 167

CONTENTS OF ISSUE 167 (1)

Engineering Mechanics

Time and frequency domain analyses of single-degree-of-freedom systems
Ajaya K. Gupta, Tasnim Hassan, Abhinav Gupta 1

Materials Engineering

J integral estimation fracture analysis for circumferentially cracked carbon steel piping
H. Xu, P.N. Li, Y.J. Xie, Z.W. Wang 7

Measurement of the yield and tensile strengths of neutron-irradiated and post-irradiation recovered vessel steels with notched specimens
A. Valiente, J. Lapeña 11

Analysis of the effect of interaction between shear and bending loads on the buckling strength of cylindrical shells
Kazuyuki Tsukimori 23

Effects of off-centered cracks and restraint of induced bending caused by pressure on the crack-opening-area analysis of pipes
S. Rahman, N. Ghadiali, G.M. Wilkowski, N. Bonora 55

Fundamental study on applications of damage mechanics to evaluation of material degradation
Noriyoshi Maeda, Takayuki Watanabe, Michiaki Yoshino, Wen wei Gu 69

Thermal-Hydraulics, Safety and Risk Analysis

Probabilistic fire analysis capabilities, applications and weak points
P. Fernandez 77

Reliability of systems subject to common-cause hazards assumed to obey an exponential power model
M.A. El-Damcese 85

Technical Engineering Note

Decontamination of the reactor coolant pump in Maanshan nuclear power plant
Iuan-Jou Yang, Mao-Ying Teng, Wu-Ing Huan, Yuan-Lung Sun 91

Announcement 99

Instructions to Contributors 101

CONTENTS OF ISSUE 167 (2)

Fuel Engineering

Conversion of high enriched uranium in thorium-232-based oxide fuel for light and heavy water reactors: MOX-T fuel
E.I. Vapirev, V.I. Dimitrov, T.J. Jordanov, I.D. Christoskov 105

Instrumentation and Control

Guidelines for computerized presentation of emergency operating procedures
Y. Niwa, E. Hollnagel, M. Green 113

Materials Engineering

Statistical models for estimating fatigue strain–life behavior of pressure boundary materials in light water reactor environments
J.M. Keisler, O.K. Chopra, W.J. Shack 129

Effect of lead on Inconel 600 and Incoloy 800 oxide layers formed in simulated steam generator secondary environments
M. García-Mazario, A.M. Lancha, M. Hernández, C. Maffiotte 155

Application of positron annihilation line-shape analysis to fatigue damage for nuclear plant materials
N. Maeda, N. Nakamura, M. Uchida, Y. Ohta, K. Yoshida 169

Thermal-Hydraulics, Safety and Risk Analysis

Modelling of void formation in the subcooled boiling regime in the ATHLET code to simulate flow instability for research reactors
A. Hainoun, E. Hicken, J. Wolters 175

Simple method for risk assessment of nuclear power plant refueling outages
R.J. Rohrer, C.F. Nierode 193

Status of the small modular fluidized bed light water nuclear reactor concept
F. Sefidvash 203

Technical Engineering Notes

Pressure vessel steel fracture toughness in the regime from room temperature to 400 °C
A.A. Marengo, J.E.P. Ipiña 215

Combination coding control rod position-indicating system
J. Yueyuan, W. Wenran, Y. Nianzu, L. Dezhong 223

Staff training program of CANDU nuclear projects in Saskatoon
J. Huterer 229

Instructions to Contributors 235

CONTENTS OF ISSUE 167 (3)

Thermal-Hydraulics, Safety and Risk Analysis

Engineering the development of Optical Fiber Sensors for adverse environments
M.C. Hastings, B. Chiu, D.W. Nippa 239

Evaluating 'new' instrumentation and control technologies for safety-related applications in nuclear power plants
K. Korsah, C. Antonescu 251
Results of examinations of pressure vessel samples and instrument nozzles from the TMI-2 lower head
G.E. Korth, D.R. Diercks, L.A. Neimark 267
Interpretation of the results of the CORA-33 dry core boiling water reactor test
L.J. Ott, S. Hagen 287
Analysis of chaotic instabilities in boiling systems
C.-J. Chang, R.T. Lahey Jr. 307
Simulation of the pressure set-point change transient with the Kuosheng plant analyzer
S.-J. Wang, S.-H. Chang, C.-S. Chien, S.-C. Jeng 335
Application of a self-organizing fuzzy logic controller to nuclear steam generator level control
G.Y. Park, P.H. Seong 345
IIST and LSTF counterpart test on PWR station blackout transient
T.-J. Liu, C.-H. Lee, Y.-S. Way 357
Advanced fuel elements for passive pressure tube light water reactors
P. Hejzlar, B.T. Mattingly, N.E. Todreas, M.J. Driscoll 375
